**Writing a Tiering Exception Request Letter**

The following information is presented for informational purposes only and is not intended to provide reimbursement or legal advice. Laws, regulations, and policies concerning reimbursement are complex and are updated frequently. While we have made an effort to be current as of the issue date of this document, the information may not be as current or comprehensive when you view it. Providers are encouraged to contact third-party payers for specific information on their coverage policies. For more information, please call Taltz Together™ at 1-844-TALTZ-NOW (1-844-825-8966).

A tiering exception is a type of coverage determination. This type of exception is used when a medication is on a plan’s formulary, but it is placed in a non-preferred tier that has a higher co-pay or co-insurance. Plans may make a tier exception when the drug is demonstrated to be medically necessary. The healthcare provider (HCP) submits a Tiering Exception Request Letter to request that the medication be offered at a lower co-pay that is usually reserved for preferred drugs. A Tiering Exception Request Letter can help make medication more affordable for patients covered through Medicare or TRICARE who may not be eligible to participate in savings programs.

This resource, *Writing a Tiering Exception Request Letter*, provides information to HCPs when drafting a Tiering Exception Request Letter. A checklist is included below on what to include in the letter. Sample letters are attached to this document and include useful information that many health plans require to process the request. The patient’s medical records and a Letter of Medical Necessity (LMN) are submitted with the letter. The Tiering Exception Request Letter may originate from the patient, HCP, or legal representative.* Both the prescribing HCP and patient should sign the letter.

Plans often have specific Tiering Request Forms that must be used. These forms may be downloaded from each plan’s website. Follow the plan’s requirements when requesting Taltz® (ixekizumab) injection (80 mg/mL), otherwise, treatment may be delayed.†

**TIERING EXCEPTION REQUEST LETTER CONSIDERATIONS**

- Include the patient’s full name, plan identification number, and date of birth
- Add the prescribing HCP’s name, relationship to the requestor, National Provider Identifier (NPI) number, specialty, address, telephone number/fax number, and date of submission
- Record the patient’s current diagnosis
- Provide a copy of the patient’s records with the following details:
  - Patient’s history, diagnosis and specific International Classification of Diseases (ICD) code(s), and present-day condition and symptoms
  - Patient’s recent history of infection(s), along with any allergies and existing comorbidities
- Supply a recent photo(s) of the impacted area(s)
- Document prior treatments and the duration of each treatment
  - Describe the rationale for why each treatment was discontinued
- List the main reasons for requesting a tiering exception for Taltz
- Explain and attest to why the plan’s preferred formulary agents are not appropriate for the patient (eg, medications have been or will be ineffective, not as effective, or adverse effects)
  - List dates of trial of preferred agents
- If this letter serves as an appeal, include the case number from the denial letter, a copy of the denial letter, and a response to the denial
- Include an LMN
- Include a statement of financial hardship, written by the patient

*Requests may originate from subscriber, HCP, or legal representative. Please note for Medicare Part D subscribers: Under the Medicare Part D prescription drug benefit program, a Part D plan enrollee, the enrollee’s representative, or the enrollee’s doctor or other prescriber can request a coverage determination, including a request for a tiering or formulary exception. A request for a coverage determination can be made orally or in writing. An enrollee, the enrollee’s representative, or the enrollee’s prescriber may submit a written request for a coverage determination in any format.

*Please note that the Centers for Medicare & Medicaid Services has developed “REQUEST FOR MEDICARE PRESCRIPTION DRUG COVERAGE DETERMINATION” model forms that are posted on its website. For more information, visit https://www.cms.gov/medicare/appeals-and-grievances/medprescriptdrugapplgriev/coverage determinationsandexceptions.html.

Sample Tiering Exception Request Letter

A Tiering Exception Request Letter is used when Taltz® (ixekizumab) injection (80 mg/mL) is on a health plan’s formulary but is placed in a non-preferred tier that has a higher co-pay or co-insurance. This step may require the HCP to submit an LMN with the Tiering Exception Request Letter.

HCPs can follow this format for patients who are NOT currently receiving treatment with Taltz

[Date] [Formulary director] [Name of health plan] [Mailing address]

To whom it may concern:

My name is [HCP's name], and I am a [board-certified medical specialty] [NPI]. I am writing to request a tiering exception for my patient,* [patient's name], who is currently a member of [name of health plan]. The request is for Taltz® [dose and frequency], which is medically appropriate and necessary for this patient who has been diagnosed with moderate to severe plaque psoriasis, [ICD code(s)]]. I am requesting that Taltz be made available to my patient as a preferred medication.

In the past, [patient's name] has attempted other treatments for moderate to severe plaque psoriasis, but those trials have failed due to either inadequate efficacy or lack of tolerability.

Currently, [patient's name] has the following unresolved symptoms:

• [Symptom 1]
• [Symptom 2]

Along with this letter, I have enclosed a copy of the patient’s medical records and a Letter of Medical Necessity. The letter describes why Taltz is medically necessary for my patient’s care over the preferred drugs listed in the plan’s formulary. [Explain why lower-tiered formulary drugs would not be as effective as Taltz.]

The reason I am requesting a tiering exception is because the cost associated with Taltz’s assigned tier would present a financial burden to [patient’s name]. Furthermore, it prevents my patient from utilizing a medication that will help treat the moderate to severe plaque psoriasis.

*Requests may originate from subscriber, HCP, or legal representative. Please note for Medicare Part D subscribers: Under the Medicare Part D prescription drug benefit program, a Part D plan enrollee, the enrollee’s representative, or the enrollee’s doctor or other prescriber can request a coverage determination, including a request for a tiering or formulary exception. A request for a coverage determination can be made orally or in writing. An enrollee, the enrollee’s representative, or the enrollee’s prescriber may submit a written request for a coverage determination in any format.

*Identify drug name, strength, dosage form, and therapeutic outcome.
Sample Tiering Exception Request Letter

HCPs can follow this format for patients who are NOT currently receiving treatment with Taltz® (ixekizumab) injection (80 mg/mL).

To summarize, I consider Taltz to be the best option in successfully treating [patient’s name]’s moderate to severe plaque psoriasis. Please contact me, [physician’s name], at [physician’s telephone number] for a peer-to-peer review or to answer any pending questions.

Sincerely,

[Physician’s name and signature]    [Patient’s name and signature]
[Physician’s medical specialty]    [Patient’s name and signature]
[Physician’s NPI]    [Physician’s practice name]
[Phone #]    [Fax #]

Encl: Medical records, Letter of Medical Necessity, photo[s], statement of financial hardship from [patient’s name], previous denial letter (if this is an appeal), medical notes in response to the denial (if this is an appeal).
Sample Tiering Exception Request Letter

A Tiering Exception Request Letter is used when Taltz® (ixekizumab) injection (80 mg/mL) is on a health plan’s formulary but is placed in a non-preferred tier that has a higher co-pay or co-insurance. This step may require the HCP to submit an LMN with the Tiering Exception Request Letter.

HCPs can follow this format for patients who HAVE been treated with Taltz and have had treatment interruptions.

Sample Tiering Exception Request Letter

HCPs can follow this format for patients who HAVE been treated with Taltz® (ixekizumab) injection (80 mg/mL) and have had treatment interruptions

When comparing [patient’s name]’s moderate to severe plaque psoriasis symptoms before and after starting Taltz for [enter length of time on Taltz], the results confirm that Taltz is medically necessary for managing the disease. The reason I am requesting a tiering exception for my patient is because the cost associated with Taltz’s assigned tier has presented a financial hardship for [patient’s name].

To summarize, I consider Taltz to be the best option in successfully treating my patient’s moderate to severe plaque psoriasis. Please contact me, [physician’s name], at [physician’s telephone number] for a peer-to-peer review or to answer any pending questions.

Sincerely,

[Physician’s name and signature]    [Patient’s name and signature]

[Physician’s medical specialty]    [Physician’s NPI]
[Physician’s practice name]    [Phone #]
[Fax #]

Encl: Medical records, Letter of Medical Necessity, photo[s], statement of financial hardship from [patient’s name], previous denial letter (if this is an appeal), medical notes in response to the denial (if this is an appeal)
Tiering Exception Appeal

If this Tiering Exception Request Letter is an appeal, sample copy should include the following:

This is a tiering exception appeal. I have included a copy of the original denial letter and medical notes in response to the denial.

For appeals,* include the following:

• A copy of the denial letter

• Medical notes, written by the prescribing physician, in response to the denial letter

Indication and Usage for Taltz® (ixekizumab) injection (80 mg/mL)
Taltz is indicated for the treatment of adults with moderate to severe plaque psoriasis who are candidates for systemic therapy or phototherapy.

Important Safety Information

CONTRAINDICATIONS
Taltz is contraindicated in patients with a previous serious hypersensitivity reaction, such as anaphylaxis, to ixekizumab or to any of the excipients.

WARNINGS AND PRECAUTIONS
Infections
Taltz may increase the risk of infection. The Taltz group had a higher rate of infections than the placebo group (27% vs 23%). Serious infections have occurred. Instruct patients to seek medical advice if signs or symptoms of clinically important chronic or acute infection occur. If a serious infection develops, discontinue Taltz until the infection resolves.

Pre-Treatment Evaluation for Tuberculosis
Evaluate patients for tuberculosis (TB) infection prior to initiating treatment with Taltz. Do not administer to patients with active TB infection. Initiate treatment of latent TB prior to administering Taltz. Patients receiving Taltz should be monitored closely for signs and symptoms of active TB during and after treatment.

Hypersensitivity
Serious hypersensitivity reactions, including angioedema and urticaria (each ≤ 0.1%), occurred in the Taltz group in clinical trials. Anaphylaxis, including cases leading to hospitalization, has been reported in post-marketing use with Taltz. If a serious hypersensitivity reaction occurs, discontinue Taltz immediately and initiate appropriate therapy.

Inflammatory Bowel Disease
Crohn’s disease and ulcerative colitis, including exacerbations, occurred at a greater frequency in the Taltz group (Crohn’s disease 0.1%, ulcerative colitis 0.2%) than in the placebo group (0%) during clinical trials. During Taltz treatment, monitor patients for onset or exacerbations of inflammatory bowel disease.

Immunizations
Prior to initiating therapy with Taltz, consider completion of all age-appropriate immunizations according to current immunization guidelines. Live vaccines should not be given with Taltz.

ADVERSE REACTIONS
Most common adverse reactions (≥1%) associated with Taltz treatment are injection site reactions, upper respiratory tract infections, nausea, and tinea infections.
